WAAAAAAAAAAAAAAAGH!

CAVEATS

This template was made based on a quick look at an Ork codex.

Other caveats of this template include:

- No figure environment. There are workarounds, but floats *will not work* in multicol environment. Passing `twocolumn` option to `article` class allows floats (along with the normal `figure*` to span across columns), but then you only have two columns.

- Footnotes are like this[1]. If you want footnotes that only span the bottom of columns, there are solutions online. Also, footnotes may not appear on the same page as they were referenced. Again, solved by `twocolumn` option used instead.
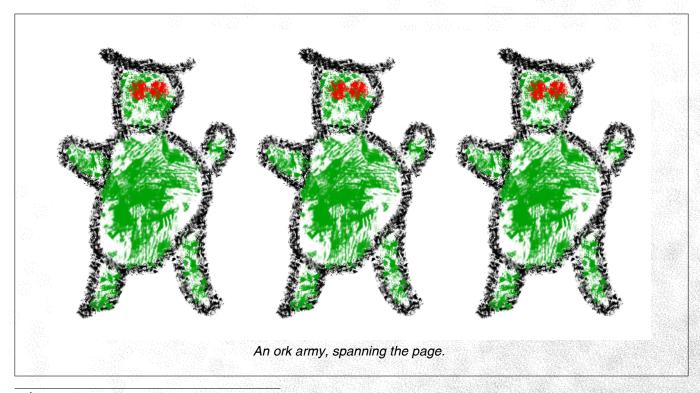

- If you want more control of things (e.g. having a picture span across only two columns), I recommend the `flowfram` package. It is more complicated that `multicol`, but gives enough control over layout that you could make a professional magazine if you wanted to.

- Chapter headings probably look best if they are outside the `multicol` environment (this is the default if you use `twocolumn` instead of `multicol`), but you can see for yourself down below.

Although there are no figures, you can still create a minipage with an image and some text. Or even just text, for those little stories. In fact, one can probably be very careful and create a `picture` environment with `parbox`s and `includegraphics`s such that you get those nice little text boxes that look like paper.

That is one mean looking ork.

Fancy headings ala 40k codex's are possible through XƎTEX. If this document is compiled with XƎLATEX, it will try and use the font 'Civic' and 'Helvetica', so make sure they're installed. If not, Helvetica will be used throughout. The rest of this document is Lorem Ipsum to show how how good it is.

An ork army, spanning the page.

---

[1]See? This footnote will span across the whole page if it gets the chance!
